WWT 54  Collection Systems Operator (3)
3 hours lecture
Wastewater collection systems and collection system equipment, pipeline cleaning and maintenance, system design, safety procedures, inspecting and testing procedures used in collections systems.

WWT 56  Instrumentation and Controls (3)
3 hours lecture
Note: Cross listed as WTE 56
Introduction to basic electrical theory, applications, common uses, and real world examples of control systems and instrumentation used in water distribution, wastewater treatment plants; including switches, relays, alarms, motors, instrumentation, valve actuators, computers, and communication.

WWT 58  Backflow Prevention (3)
2½ hours lecture - 1½ hours laboratory
Note: Cross listed as WTE 58
Provides intensive training focused on the field testing procedure for backflow prevention devices and training in the recognition and abatement of cross connections in water and plumbing systems. Students will acquire the knowledge, skills, and abilities required to test as a certified backflow tester.

WWT 60  Supervision (3)
3 hours lecture
Note: Cross listed as PWM/WTE 60
Supervisory aspects of public agencies including organization, decision making, coordination, communication, and public relations. Personnel supervision including coaching, training, evaluation, discipline, team building, morale, and grievances. Safety programs and encouraging safe conditions, actions and attitudes.

WWT 62  Cross Connection Specialist (3)
3 hours lecture
Recommended preparation: WTE/WWT 58
Note: Cross listed as WTE 62
The study of the various levels of administrative and technical procedures necessary to operate a cross connection control program. Students will obtain the knowledge to become certified as a “Cross Connection Control Specialist” under the provisions set forth by the American Water Works Association.

WWT 64  Treatment Process Control (3)
3 hours lecture
Recommended preparation: WWT/WTE 50
A wastewater treatment and disposal course with an emphasis on control of these processes. Topics covered include: the activated sludge secondary treatment process and its variations; sludge digestion, treatment and disposal; safety and housekeeping; maintenance and an overview of effluent disposal, tertiary treatment and reclamation. Emphasis is also given to the role of the operator and provides preparation for solving process control calculations and problems typical of those found in Operator Certification examinations.

WWT 66  Motors and Pumps, Operation and Maintenance (3)
3 hours lecture
Recommended preparation: WTE/WWT 50
Note: Cross listed as WTE 66
Identification of problems encountered, causes of problems, corrective solutions, and repairs in the operation of pumps and motors. Implementation of maintenance programs including scheduling and recordkeeping.

WWT 97  Wastewater Technology Education Topics (5 - 4)
Units awarded in topics courses are dependent upon the number of hours required of the student. Any combination of lecture and/or laboratory may be scheduled by the department. Refer to Class Schedule.
Topics in Wastewater Technology Education. See Class Schedule for specific topic offered. Course title will designate subject covered.

Associate in Science Degrees -
AS Degree requirements are listed in Section 6 (green pages).
• Water Technology Education

Certificates of Achievement -
Certificate of Achievement requirements are listed in Section 6 (green pages).
• Water Technology Education

PROGRAM OF STUDY

Water Technology Education
Provide comprehensive education to a diverse constituency for a career in the water and wastewater field that prepares students to contribute effectively in a profession responsible for protecting public health.

A.S. DEGREE MAJOR OR CERTIFICATE OF ACHIEVEMENT

* CE 100 Cooperative Education | 3 - 4

TOTAL UNITS 30

* Cooperative Education must be related to this major.

COURSE OFFERINGS

Courses numbered under 100 are not intended for transfer credit.

WTE 50  Waterworks Mathematics (3)
3 hours lecture
Note: Cross listed as WTE 50
Provides instruction in entry-level to intermediate-level mathematical calculations used in the operation and evaluation of conventional water/wastewater treatment processes and water distribution systems. The course content has been developed to meet requirements for entry to water/wastewater education program courses. Course will cover basic geometry, metric conversions, flows, pressure, and chemical dosage as it relates to the water/wastewater industry. Material will parallel some of the problems found on State Certification examinations.
WTE 52  Waterworks Distribution  
3 hours lecture
Prerequisite: A minimum grade of ‘C’ in WTE/WWT 50
Water utility system operations and maintenance. An introduction to the principles of pressure pipe systems and the hydraulics involved in their operation. Design, installation, operation, and maintenance of basic elements of water systems including pipes, pumps, valves, meters, and related hydraulic units. Operations and maintenance safety considerations emphasized. This course prepares students for the State of California - Water Distribution Operator Grade I, Grade II. and Grade III exams.

WTE 54  Water Treatment Plant Operation I  
3 hours lecture
Prerequisite: A minimum grade of ‘C’ in WTE/WWT 50
Provides an introduction to water treatment plant operations in accordance with the Safe Drinking Water Act (SDWA). Special emphasis is given to implementation of the Surface Water Treatment Rule through USEPA approved filtration technology. Subject matter includes major provisions of the SDWA and its amendments: basic water chemistry; source water assessment; conventional treatment processes; treated water stability; waterborne diseases; public health protection; disinfection; and an introduction to math skills equivalent to those required of State of California Grade II water treatment plant operators. This class is helpful to those preparing for the Grade I and Grade II state examination.

WTE 56  Instrumentation and Controls  
3 hours lecture
Prerequisite: A minimum grade of ‘C’ in WTE/WWT 50
Note: Cross listed as WWT 56
Introduction to basic electrical theory, applications, common uses, and real world examples of control systems and instrumentation used in water distribution, water and wastewater treatment plants; including switches, relays, alarms, motors, instrumentation, valve actuators, computers, and communication.

WTE 58  Backflow Prevention  
2½ hours lecture - 1½ hours laboratory
Note: Cross listed as WWT 58
Provides intensive training focused on the field testing procedure for backflow prevention devices and training in the recognition and abatement of cross connections in water and plumbing systems. Students will acquire the knowledge, skills, and abilities required to test as a certified backflow tester.

WTE 60  Supervision  
3 hours lecture
Note: Cross listed as PWI/WWT 60
Supervisory aspects of public agencies including organization, decision making, coordination, communication, and public relations. Personnel supervision including coaching, training, evaluation, discipline, team building, morale, and grievances. Safety programs and encouraging safe conditions, actions and attitudes.

WTE 62  Cross Connection Specialist  
3 hours lecture
Recommended preparation: WTE/WWT 58
Note: Cross listed as WWT 62
The study of the various levels of administrative and technical procedures necessary to operate a cross connection control program. Students will obtain the knowledge to become certified as a “Cross Connection Control Specialist” under the provisions set forth by the American Water Works Association.

WTE 64  Water Quality Monitoring  
2½ hours lecture - 1½ hours laboratory
Recommended preparation: WTE/WWT 50
Prepares students to properly monitor public drinking water quality through study of: Federal and State regulations, laboratory analyses, types of contaminants, sample collection techniques and interpretation of monitoring data.

WTE 66  Motors and Pumps, Operation and Maintenance  
3 hours lecture
Recommended preparation: WTE/WWT 50
Advanced water quality control and treatment with emphasis given to state regulations, EPA regulations, advanced mathematics and chemistry. Particular attention will be given to in depth examination of treatment plant processes and the enforcement of the Surface Water Treatment Rule, Total Coliform Rule, Interim Enhanced Surface Water Treatment Rule, Long Term 1 Enhanced Surface Water Treatment Rule, Long Term 2 Enhanced Surface Water Treatment Rule, and Disinfection/Disinfection by Product Rule. This course will be helpful to those preparing for Grade III and IV examinations.

WTE 72  Waterworks Distribution II  
3 hours lecture
Prerequisite: A minimum grade of ‘C’ in WTE 52
Intermediate and advanced instruction in the field of water distribution, types of reservoirs, water lines, pumps, valves, and related appurtenances. Studies design, proper operation, and facilities repair of a public water system. Provides instruction in methods of record keeping and administrative responsibilities related to water systems. This course prepares students for the California Department of Health Services, Water Distribution Operator certification exams at levels D-3, D-4, and D-5 and the “American Water Works Association” certification exams for Grades II, III, and IV.

WTE 74  Water Treatment Plant Operation II  
3 hours lecture
Prerequisite: A minimum grade of ‘C’ in WTE 54
Intermediate and advanced instruction in the field of water distribution, types of reservoirs, water lines, pumps, valves, and related appurtenances. Studies design, proper operation, and facilities repair of a public water system. Provides instruction in methods of record keeping and administrative responsibilities related to water systems. This course prepares students for the California Department of Health Services, Water Distribution Operator certification exams at levels D-3, D-4, and D-5 and the “American Water Works Association” certification exams for Grades II, III, and IV.

WTE 97  Water Technology Education Topics  
(5 - 4)
Units awarded in topics courses are dependent upon the number of hours required of the student. Any combination of lecture and/or laboratory may be scheduled by the department. Refer to Class Schedule. Topics in Water Technology Education. See Class Schedule for specific topic offered. Course title will designate subject covered.
