In addition, I have a mailbox on campus, which I will check for messages prior to class. If necessary, please feel free to call my home and leave a message. I will try to be in the classroom prior to class and will stay as long as necessary after class for questions and/or problems. In case I am late for class, please check with the office for instructions. Please review your Semester Calendar for scheduled class dates.

COURSE OBJECTIVE: For the student to acquire a working knowledge and understanding of beginning Accounting Principles and Practices. The student will become familiar with the basic accounting model and acquire knowledge of how the business community records financial information.

TEXT:

1. Financial Accounting—Warren/Reeve/Fess—7th Edition
2. Working Papers

ATTENDANCE: While not mandatory, I strongly recommend regular class attendance. Accounting is a field, which builds upon itself and an absence from any one class can put a student at a disadvantage.

HOMEWORK: Various problems are assigned and are listed on the Course Outline attached. Specific assignments may be collected and graded. This is not intended to force you to do the work, but to measure the understanding of the material of each student. All assigned problems will be reviewed in class.

I intend this to be a challenging, yet exciting and enjoyable class. Class participation and personal experiences are encouraged. Let's all learn together and from each other.
