Front End Designer Summer Internship

Carlsbad, California, United States · Global Design

Description

We love our churches. We love our team. We love our products. We are dedicated to making the lives of church volunteers and staff members simpler through elegant systems and easy-to-use software. If you have a desire and a passion for learning to work with cutting edge technology while helping churches, then this internship is for you!

We are looking for an aspiring designer/developer to temporarily work with us on-site at our offices in beautiful Carlsbad CA for the summer (June - August). You'll be working with cutting edge web technologies to enhance features that will help people worldwide, and a dedicated team that includes developers, designers, copywriters, and product managers. Day to day tasks may include fixing bugs, assisting with in-progress features, and working with the Global Design team; absolutely no getting coffee or anything like that ☺

Requirements

Responsibilities:

- Work closely with lead designers and development team to refine features in our products
- Assist team in helping with feature development
- Be responsible for solving feature related issues you are entrusted with
- Collaboration with large code bases using the following languages: HTML, CSS, & JS

Qualifications:

- Currently pursuing or recently obtained a degree or certification in Computer Science, Design, Web Development or related field
- Experience with Github or similar version control application
- Eagerness to learn
- Demonstrated ability to be resourceful and innovative
- A dedicated work ethic and a desire to make the world a better place through technology

Exceptional Qualifications:

- Ability to showcase knowledge with Rails, React JS, or related frameworks
- Work experience with multi-tasking in tech startup or agency

Benefits

- Paid Summer Internship at \$20 per hour (32 hr week)
- Ready to use MacBook Pro
- Access to a full kitchen with free snacks and drinks
- Game room with Arcade
- Take away marketable features for portfolio expansion
