

Hello, we were referred to you by the VA in regard to a care giver.

The amount of care needed at this time is minimal. We would like to find someone capable with a 93 year old – mostly blind – partially deaf female. She is very capable and extremely independent. Care involves setting prewrapped meds out, making sure hearing aids/ alerts are on- charged. Weekly blood pressure. Once a week shower standby, and once a month laundry – maybe light dusting (COPD).

Since the current amount of care is so little, a caregiver either living or working in Escondido already is best. Please let me know if there is someone in the area, and their background / qualifications.

Please only forward relevant candidates.

Thank you, Patti
