

Interval Notation

Goal: to solve inequalities and write answers in interval notation.

Ⓧ Graph the solution set and write it in interval notation.

a) $y > 7$

$(7, \infty)$ interval notation

- $>$ "greater than"
- $<$ "less than"
- \geq "greater than or equal to"
- \leq "less than or equal to"

set-builder notation
 $\{y \mid y > 7\}$

b) $y \leq 10$

$(-\infty, 10]$

ⓧ solve, write the answer in interval notation.

$$a) \frac{3}{4}x - 2 > 7$$

$$\begin{array}{r} +2 \quad +2 \\ \hline \frac{4}{\cancel{2}} \cdot \frac{\cancel{3}}{4} x > \frac{\cancel{9}}{1} \cdot \frac{4}{\cancel{2}} \end{array}$$

$$x > 12$$

$$b) 4(z-1) + 2 \geq (3z+8) - 2z$$

$$4z - 4 + 2 \geq z + 8$$

$$4z - 2 \geq z + 8$$

$$\begin{array}{r} -z \quad +2 \quad -z \quad +2 \\ \hline 3z \geq 10 \end{array}$$

$$3z \geq 10$$

$$z \geq \frac{10}{3}$$

$$c) -5x + 2 \geq 12$$

$$\frac{-5x}{\underline{-5}} \geq \frac{10}{\underline{-5}}$$

$$x \leq -2$$

$$(-\infty, -2]$$

$$3 < 5$$

$$-3 > -5$$
